

## HyDraw® CAD 2020 SP2 IT

Applicability: HyDraw CAD 2020 IT with/without SP1 and Hotfixes

### Issues Resolved:

1. With large schematics, the System tab repeatedly refreshes when a symbol is deleted.
2. In large schematics for a selected symbol, data populates slowly in HyDraw Property Manager.
3. In large schematics, deleting connection lines is slow.
4. In a few cases, properties of selected entities are not displayed in HyDraw Property Manager.
5. In large schematics, deleting symbols is slow.
6. Canceling Envelope command with Right-Click causes instability in HyDraw.
7. In FluidPowerTools.com, Manufacturer - Data Access Settings do not work for a particular session.
8. Connection lines with more than 100 vertices causes instability.
9. Connection lines merge into a single line at the connection dot.
10. Editing Solenoid IDs in subsystem displays an error.
11. In specific drawings, exporting a layout to Model Layout displays an error.
12. Split Parts list in a schematic causes instability when running a batch plot.
13. In specific cases, unable to edit Title block attributes.
14. Export to MDTools displays an error if engravings are deleted.
15. Include Accessories not checked when reassigning Item ID and creating Parts List.
16. Files saved as DXF does not open in HyDraw.
17. Editing symbol in the child library displays an error.
18. Export to the IGES (igs) format displays an error.
19. Properties of child items of a subsystem are not populating in HyDraw Property Manager.
20. In a few cases, the orientation of External Port over envelope is incorrect.
21. Errors related to the use of the AUDIT command is observed.
22. In Title block, unable to use system or file parameters as attributes (e.g., date or file name).
23. When adding Display format from Symbol Menu, the text height is not defined in HyDraw Options > Misc tab.
24. Unable to open Parts List in Excel if saved and exported in any other file format than .xls.
25. In specific cases, Convert to HyDraw connection line creates incorrect connection dots.

26. HyDraw Property Manager is unable to populate properties for polyline converted to the HyDraw connection line.
27. HyDraw scales symbols by 25.4 that are <2 units height when adding to the library.
28. The Add Display Format command does not display any format for folders with less than three symbols.
