

## HyDraw Library Manager 2020 Hotfix 03

Applicability: HyDraw Library Manager 2020 with SP1.0 installed

### Issues Resolved:

1. Unable to save data, when the model properties name includes a 'comma', e.g. 'Port Size, Tank'
2. "Inside Components > Model Data View:  
After model code search, selecting a symbol does not highlight the located folder."
3. Import from Excel command ignores comma as decimal separator with Regional Settings & SQL Database.
4. Unable to delete manufacturer, when the manufacturer name includes a single quote.
