

HyDraw® Library Manager 2022 Hotfix 01 EN/IT

Applicability: HyDraw Library Manager 2022 English/Italian

Issues Resolved:

1. Switching between Symbol View and Model Data View closes HyDraw Library Manager.
2. On symbol update, all modified symbols are not replaced.
3. On exporting data to Excel, the document column was missing.
4. On inserting a decimal, the Cracking Pressure property rounded up to the nearest whole number.
5. Updating the symbol library causes instability.
6. An error within the Italian database resulted in the data type not being displayed.
7. When exporting model data to Excel, properties starting with 0 have the zeros removed.
