What's New

MDTools® *i*2025

MDTools i2025 What's New

Inventor 2025 compatibility

Inventor has switched to Microsoft .NET Core from .NET Framework, forcing MDTools to switch as well. (specifically .NET 8)

Due to this MDTools i2025 is compatible with Inventor 2025 and Inventor 2026 but not Inventor 2024 and previous versions.

MDTools i2025 has no new features compared to MDTools 790. However, in addition to the compatibility, 39 minor bugs were fixed.

MDTools Library Manager 2025

New import cavity from MBXML

More accurate custom outline import from drawing
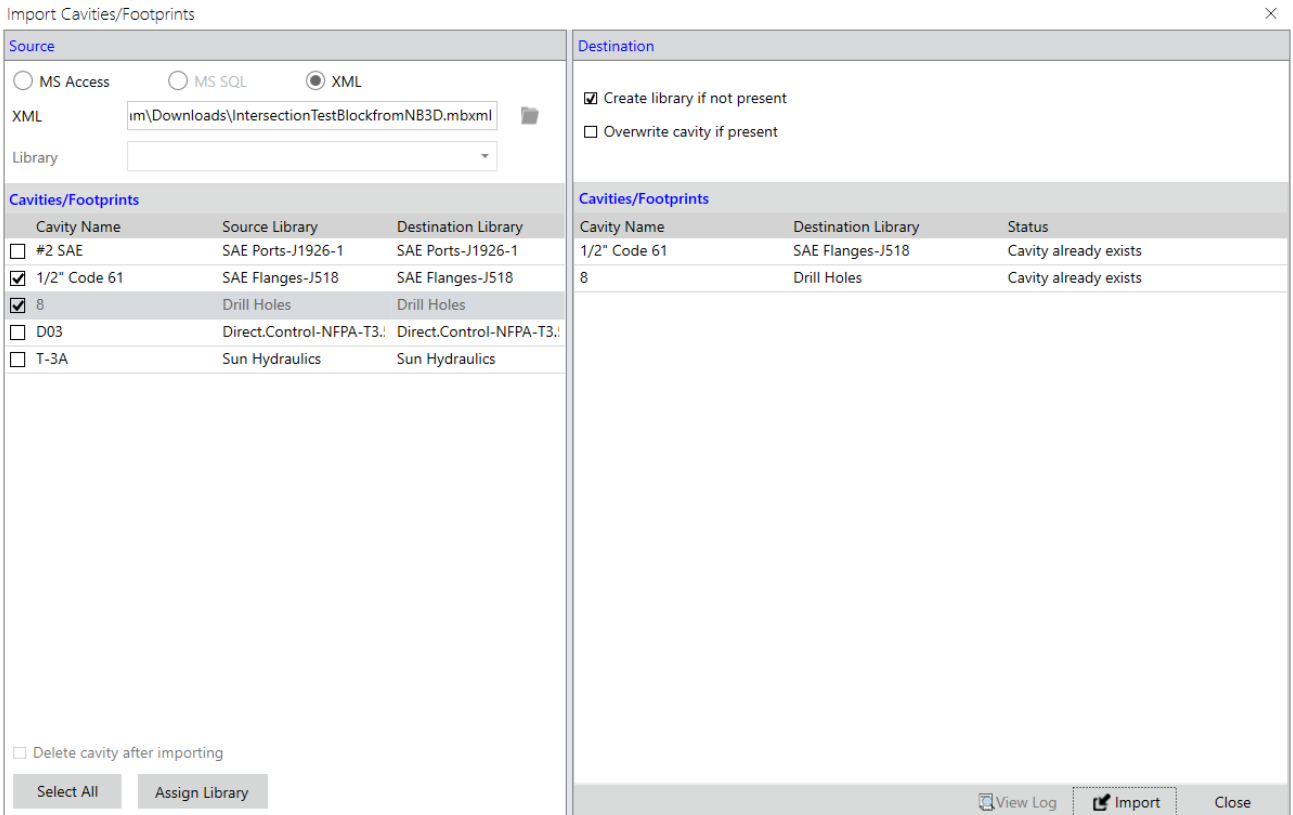

Autodesk Vault 2025 compatible

Import cavity from MBXML

MDTools Library Manager 2025

Using MLM 2025 you can now import cavities from MBXML.

This can be useful if you've customized a cavity or footprint while using MDTools that you would like to add to your library.

Thank You
